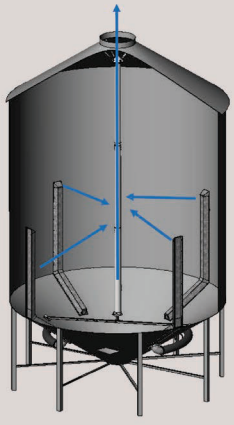
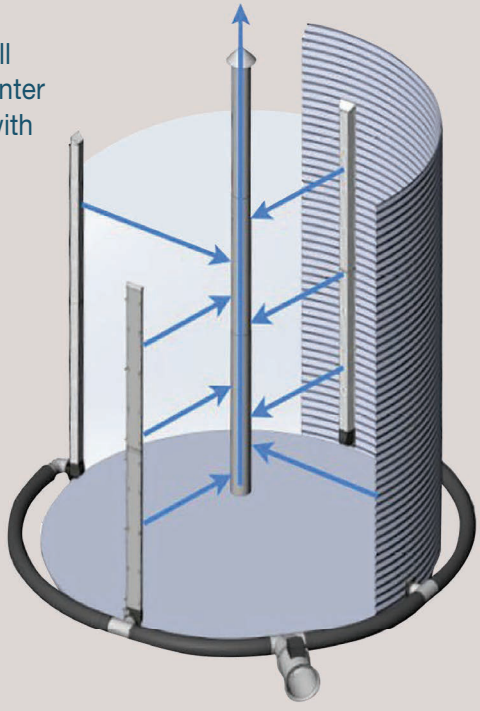
Innovative & Effective Solutions For Your Farm

CROSSFLOW AERATION

Crossflow aeration moves air horizontally from the louvered wall columns on the bin wall to the center of the bin where it is exhausted with a perforated grainair tube.



ANY SIZE BIN



High performance canola aeration

RETROFITTABLE

3 IN 1 AERATION: DRYING, COOLING & NATURAL CONVECTION ONCE FAN IS SHUT OFF

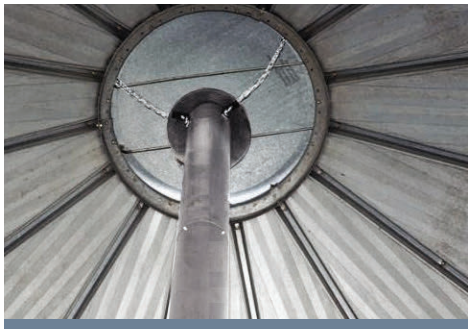
AUGER HOG

Increase your auger speed by 20-30 %

The only quick detach, adjustable hopper that supercharges auger capacity and totally eliminates grain spitting & spraying.

3 SIZES AVAILABLE.

Optional fertilizer screen.



STOP YOUR CANOLA FROM HEATING

GRAINAIR TUBE & VENT-A-LID

Powerless Aeration

Maximize existing aeration systems, by increasing airflow with an aeration booster.

- Designed to work with natural convection, the perforated GrainAir Tube allows heat and moisture to escape the bin quickly.
- Also quonset, shed and grain pile options.

Our Vent-a-lid allows your bin lid to be fully closed without worry.
