LED Buying Guide

4 questions to ask before choosing your LED lights

1) LED chip type and grade

Not all chips are equal. Low quality chips don't last and it's usually reflected in the warranty.

2) Lens Material

Kodiak Polycarbonate/Lexan is designed to withstand a shotgun blast.

3) Water/Dustproof Capacity

Measured in IP rating. The higher the number the better the rating.

4) Warranty

Kodiak features a 5 year FREE replacement warranty for dust, water penetration or defective chip.
