

Duo React

TWIN NOZZLE CONTROL

Operate 30% Faster While Maintaining Spray Efficacy

What does it do for you?

- Automatically switches nozzles based on speed to manage droplet size
- Allows use of industry leading air induction nozzles to make a reliable spray application

Benefits

Increase Speed Range

Control Spray Droplet Size

Limit Drift Potential

4 mph → 7 mph → 11 mph → 18 mph
[6 Kph] → [11 Kph] → [18 Kph] → [29 Kph]

Turning corners or
traveling up hill

Flat, open field
(top speeds)

Contact AgStar today for more information on the Duo React System or to find an authorized dealer.

AgStar is an authorized distributor for Hypro-ShurFLO focused on Crop Protection Technologies that improve the efficiency, economics, efficacy and environmental impact for the end user.

To become a dealer please call or email for more information.

HYPRO DUO REACT - Control Droplet Size Without Compromising Spray Efficacy
Instant Nozzle On/Off Times (YES) - Air Induction Nozzle Compatible (YES) - Minimal Electronics and Wiring (YES)
Increase or Decrease Your Speed Range With Consistent Spray Quality and Droplet Size (YES)
30-60% Less Expensive than PWM Systems that Can't Use Air Induction Nozzles (YES)
