

**Makes loading your
airseeder quick & easy**

Fits Bourgault, Morris, Seed Hawk, Horsch Anderson, Ezee-On and Flexi-Coil

THE AIRSEEDER HOPPER

The Airseeder Hopper is constructed of lightweight plastic with a mounted wheel that allows it to roll easily into position. 34" W x 48" L x 12" H. Available to fit 7", 8" and 10" augers. 1 year warranty.

- Aids in the mixing and coating of inoculants and seed treatment products.
- Eliminates cracking of delicate crops by eliminating extra transfer augers.
- Easy loading from semi-trailers to airseeders.
- No hydraulic hookups.
- Mounts in place of the existing hopper
- 1/2" x 1/2" fertilizer screen included

Conveyor Adaptor for John Deere Airseeders Reaches under your semi trailer unit for fast gentle loading!

Turn two pieces of equipment into one with a conveyor adaptor for JD Airseeders. It allows you to eliminate the transfer auger when loading your airseeder from your belly dump semi. The plastic hopper design is more forgiving, so it virtually eliminates cracking in sensitive crops like soybeans, etc. Folds onto existing conveyor for transport (shown left). Operates on conveyor hydraulics. Small size fertilizer screen is included. For 2008 and older Carts, case drain line supplied on request.

Lift Kits

Airseeder Auger lift kits give you a full 6" of lift on the end of your auger to easily fit over the tank.

Components are precision cut and drilled to fit easily into place. For Case IH, New Holland and Flexi-Coil.
