

All Size "SYNTIRO" Support System

SYNTRINO Ladder Support

Interlocking Design

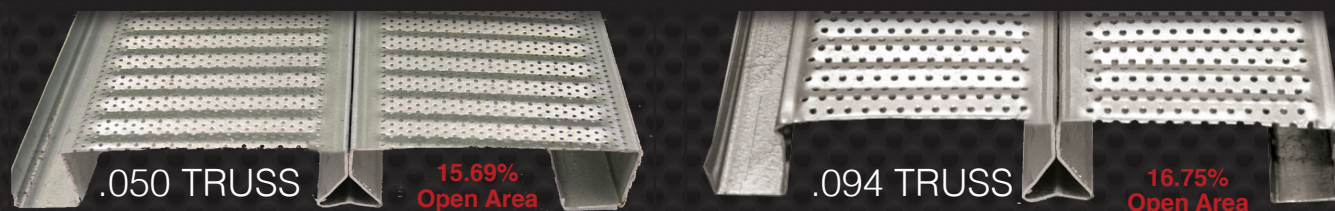

Very Stable

Locking Clips

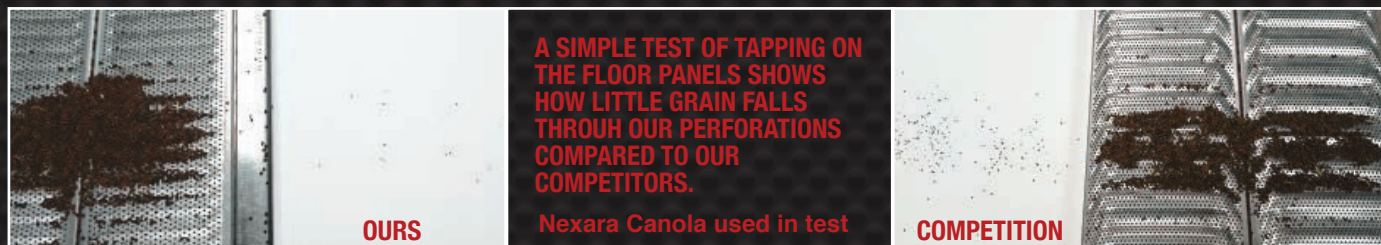

- 2 times stronger than any other ladder style support system on the market today (as tested by Industrial Technology Center Winnipeg)
- Quick and easy to install
- Available in 42" lengths
- Aerodynamic to aid in efficient airflow, also when adding heat

- Help compensate for uneven concrete floors
- Supports use a non staggered installation
- Use an interlocking system to eliminate movement
- Flooring lays flat on support without snapping to support for easier install & replace planks
- (Patent pending)
- 5 year warranty on Syntiro floor kits

All Size Flooring Systems - The "TRUSS" Design

The "TRUSS" floor panel is our strongest floor to date. The quadrilateral design rib provides increased strength to the floor with minimal aeration loss. By bracing the panel in the middle, this "TRUSS" floor is able to hold over 100 feet of grain. Our flooring panels are made to ensure the smallest gap possible between floor boards and the truss fold, as well as shallower corrugations making it easier to clean out with no grain left in the cracks. Made from G90 Galvanized metal for superior corrosion protection. Also available in the larger .094 perforation. (US Patented)

A SIMPLE TEST OF TAPPING ON THE FLOOR PANELS SHOWS HOW LITTLE GRAIN FALLS THROUGH OUR PERFORATIONS COMPARED TO OUR COMPETITORS.

All Size Dented Louver Duct System

Regardless of where you store your grain - flat bottoms or hoppers bins, quonsets, machinery storage building, in a crop circle or in a pile on the ground there's an All Size dented louver duct system that will aerate your grain effectively and efficiently.

All Size duct systems are adaptable, set up fast, are easy to remove as you haul your grain out and they stack into a compact space for storage.

Available with custom openings from 1/64" to 7/64" to match your crop and air flow requirements. Duct systems available with 24" or 32" screen area. Truss style internal supports for columns of grain over 20'. Tested with 40' of grain.

ALSO AVAILABLE IN SHEETS FOR CUSTOM MANUFACTURERS AND OEM'S!

Duct systems for any storage

Dry a mountain of grain

Any number of crosses, any size

New All Size Flashing

- ribbed design for stronger finished edge
- built to endure years of sweep auger use
- 20" lengths mean faster assembly

Our "T" track is a clean transition from the aeration floor to any flat surface. Used in "Pit" and "Tunnel" aeration floor designs.
