

The Most Comprehensive Machine Shop in SE Saskatchewan

The Best You Can Do For Your Combine

FULL FINGER HEADER AUGERS

Custom made for any make / model and priced right!
Fingers are inserted across the entire length of the auger to provide a very consistent, faster-feeding and smoother flow of crop. Pulse, tangled & lodged crops are no problem to feed through. Cleaner cutting as the crop is moved away from the cutting bar. Heavier and longer centers are used to resist cracking. Standard augers are also available.

Auger Repair: Premium re-built augers are completely inspected, straightened, professionally painted, and are ready to exchange.

JD Header Repair: Worn out header pans, skid plates (JD & CIH), and floor tins can be replaced, as well as straightening of the cutter bar and frame brackets, etc.

CROSS AUGER KITS

Our top quality, fully-extended cross auger kits will create a much-improved crop flow and a lot less hassle for you. We can repair your existing auger or manufacture a new one for most makes & models. Contact us for awesome pricing and best customer service!

HAYBINE CONDITIONING ROLLS

- Designed for a more-aggressive or less-aggressive crimp.
- Much longer wear than rubber rollers.
- Build to OEM specs for most makes & models or custom designed models.
- Complete haybine rebuilding; including augers, tins, booms.
