

# SPREADING EQUIPMENT

*FLAT BAR chain conveyance, rather than  
pocketed type chain or belting*

The FLAT BAR chain conveyance provides accurate metering of all types of products. Even inconsistent size product such as biosul is consistently brought to the rear of the bin ensuring metering accuracy.

The ProSpread Fertilizer Spreader is a great choice if you're looking for a durable and reliable spreader built for bulk spreading.

- Capacities from 5 ton to 20 ton
- Bins available in three steel types  
*Mild steel and two types of stainless steel*
- Rear steerable axle
- Headland control
- Plug in your agronomist information for variable rate and let the spreader/electronics do the rest.
- Easily adaptable to onboard tractor GPS units.
- Load cell equipped
- light & camera package available
- ISOBUS ready with raven controls
