

THE ORIGINAL

ROAD BOSS

 GRADER 

Simple • Affordable • Efficient

One pass Levels Potholes,
Ruts & Washboards

Unique multi-blade, acute-angle design effectively cuts into road surfaces, mixing, sifting and leveling the soil as it operates.

The blades create a soil "boiling" motion, sifting and depositing finer materials in lower layers with coarser material on the surface.

The blades are pulled through the road material rather than pushed as with a motorized grader. Thus the Spreader Grader performs faster, more efficiently and more economically than a motorized grader.

- SIZES RANGING FROM 4 FT. TO 16 FT.
- WORKS WITH 3-POINT OR SKID STEER

Any Tractor • Any Application • Any Size
