

**Pick the Right Droplet Size
Use the Right Spray Tip
Get the Right Result
Simple as that.**

COMBO-JET® SR/MR/DR Drift Reduction Tip/Caps

Better Coverage

patent pending

Less Drift

Optimize coverage and drift control for your application. Less plugging, easier to handle, and easier to choose which tip to use.

TIP WIZARD Tip Selector App

Tip Wizard is the easiest way to select spray tips.

Simply enter your application, and Tip Wizard gives real world advice for selecting your tip.

Available online at www.wilger.net or on FREE smartphone app.

Have you considered multi tip application?

Multi tip spraying provides excellent coverage for higher volume applications that would otherwise produce overly large droplets.

Fungicide application is a prime example of a high flow application which requires small droplets to apply effectively.

FLOW VIEW™ Visual Flow Indicators

Shows liquid flow plugs or leaks when you can't see the outlets or nozzles.

No Electronics. Easy to build & maintain. Perfect for liquid kits on seeding equipment.

Available in standard, low, and ultra low flow rate columns, with fittings for any setup.

NEW ISO color-coded metering orifices: Meter your manifold for a compact liquid kit.

Wilger's Boom End Flush Valves

A compact, half-turn valve for flushing out boom ends.

Uses premium VITON® O-rings, built for tough chemical resistance

Compatible with all 1" sprayer booms

Proudly Made in Saskatchewan
