

ACCU-VOLUME SYSTEM™

Electronic Site Gauge
TAKES The Guesswork out of Every Tank!

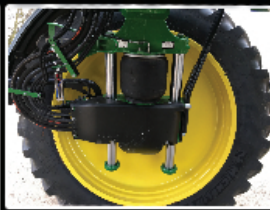

Imagine a tool, while filling your sprayer...jamming all those chemicals in, rinsing jugs, that could tell you how much was in your tank. No more chasing an unreliable cloudy site tube. The Accu-Volume System gives you the ability to load your machine Faster, Safer & ACCURATELY!

HIGH CLEARANCE LIFT KIT

Now up to 80" with a flick of the switch!

R4030, R4038 & R4044 and the New 408R, 410R & 412R
Lift kits providing up to 80" of "under frame" clearance with control right from your seat.
The one time installation "leave in design" makes for lowering & raising the R-Series simple & efficient. Go directly from normal spray height to fully raised in minutes.
Take control of the timing during your FUNGICIDE / INSECTICIDE season.

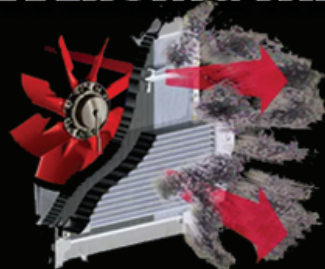

HUB COVERS

Designed to protect the crop & machine during late season applications

REVERSING FANS

Keep your sprayer radiator clean during this corn fungicide spraying season
